### **December 2021 Operational Highlights**

- Titan on the Red was successfully connected to the Online Vault classified repository; service account requests for Shared Drives and Sharepoint access were initiated. Titan on the Red is an artificial intelligence/machine learning system to make digitizing, cataloging, and searching NSRC collections easier and more efficient.
- 650 weapons code development memos were bulk-uploaded into the Online Vault classified repository. 259 linear feet of classified technical reports were rehoused in accordance with archival standards. 76 linear feet of classified technical reports were cataloged. 1,944 weapons testing documents were bulk ingested into production.
- The Rocky Flats Java-validation process was completed. This application ingests metadata and content into the Online Vault to meet the requirements for the NSRC collections.
- A pilot program was deployed to track metrics across all NSRC customer-service projects.
